Project #1 - Person Hours Estimate

Team Meetings:
- 1-2 each week (approximately 1 hour per week)
- (3 weeks) x (1 hour) x (5 people) = **15 hours**

Coding:
- Roughly 2-4 hours each week per person.
  - Smaller scale projects in previous classes tended to take approximately 5-7 hours per person, which led us to this estimate for this larger project.
- (2 weeks) x (3 hours) x (5 people) = **30 hours**

Testing:
- Approximately 1 hour per person after implementation is completed.
- (1 hour) x (5 people) = **5 hours**

Documentation:
- Approximately 1 hour per person to document throughout the project, as need arises.
- (1 hour) x (5 people) = **5 hours**

Total Estimate:
- 15 hours (Team Meetings) + 30 hours (Coding) + 5 hours (Testing) + 5 hours (Documentation) = **55 hours**
